ACRINEX

With our holistic approach to Cyber Recoverability we will help you face modern Recoverability challenges.

Acrinex,
Experts in Cyber Recovery.

ABOUT US

Acrinex delivers independent high quality Cyber Recovery Consultancy services & Service Implementation Support to become a reliable and preferred partner for organizations to **achieve and maintain its 'Cyber Recovery Readiness'**.

An organization is '**Cyber Recovery Ready**' when it has the Tools, Integration, Processes, People, Controls and Critical Data in place to restore business operations after a Cyber Attack within predefined impact boundaries.

We aim to build trustworthy and professional long lasting relationships with our customers and deliver them practical guidance across the recoverability services spectrum from goal definition to measurable Cyber Recovery Readiness outcomes.

This is always done in good collaboration with our clients where they bring their own industry experience and professional competence while we add our Cyber Recovery expertise.
It is the combination of these two factors that enables us to work as one team towards Cyber Recovery Readiness for the client organization

We guide the development of the recovery vision, strategy and implementation plan and facilitate communication that mobilizes the client organization for recovery strategy execution.

RECOVERY EXPERTS

Acrinex professionals are specialized in providing Cyber Recovery consultancy services in five key focus areas.

This helps customers become risk aware, balance their challenges, define a Cyber Recovery strategy, implement Recovery Services and test Recovery readiness for predictable outcomes.

Acrinex consultancy focus is on delivery of an adequate recovery response as a collaborative effort from both a business and IT services perspective.

Key focus areas

Recovery Scope, Strategy & Planning

IT Service Recovery & Response plans

Empowered Recovery Team

CR Services & Operations

Recovery Enablement

Skills
Acrinex founders have more than 50 years of IT management experience from which more than 10 years specifically in delivery of Disaster & Cyber recovery solutions & services.

Framework
Acrinex methods are based on NIST security and IT4IT service standards and included in our Cyber Recovery framework that ensures delivery of a high quality Cyber Recovery service environment.
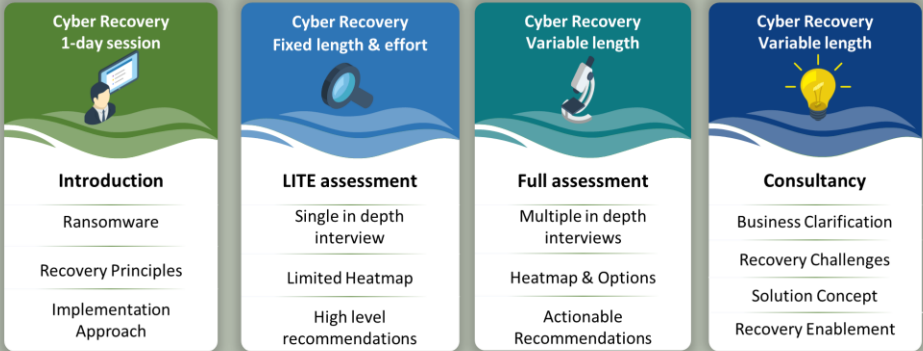

Approach
Use of the Cyber Recovery Framework drives a structured approach and ensures delivery of high quality Cyber Recovery service outcomes

ACRINEX

OUR SERVICES

Acrinex developed a set of **Recovery consultancy services** for which we created our unique **Cyber Recovery Framework** which is based on NIST and IT4IT standards.

Our engagement could start with a basic introduction session and/or lite **Cyber Recovery Assessment** activity and can grow to a full recovery assessment with follow up on-demand consultancy services as required.

Cyber Recovery 1-day session	Cyber Recovery Fixed length & effort	Cyber Recovery Variable length	Cyber Recovery Variable length
Introduction	**LITE assessment**	**Full assessment**	**Consultancy**
Ransomware	Single in depth interview	Multiple in depth interviews	Business Clarification
Recovery Principles	Limited Heatmap	Heatmap & Options	Recovery Challenges
Implementation Approach	High level recommendations	Actionable Recommendations	Solution Concept
			Recovery Enablement

A one-day introduction/workshop session is available to provide a selected audience an overview about Cyber Recovery risks, challenges & mitigation opportunities to increase awareness and grow organizational buy-in.

Pre-defined Recovery assessment services with clear deliverables are available to provide insight in recovery readiness and helps to find and remediate issues with your recoverability

Our expert consultancy services help you find an answer to your specific Recoverability challenges and delivers the Recovery services roadmap to implement or boost your Recovery Readiness
